

Aluminum plate sheet products online: <https://www.aluminumsheet.net>

3005 aluminum plate sheet belong to Al-Mg alloy, aluminum plate strength of about 3003 than the aluminum plate about 20%, corrosion resistance is also better than the. 3 series aluminum plate can also be referred to as antirust aluminum plate, China's 3 series aluminum production process is relatively good. 3 series aluminum plate is mainly composed of manganese, the content of 1.0-1.5. Rust is a better function of the series, the price is higher than the 1000 series, is a more commonly used alloy series.

Alloy	Temper	Thickness (mm)	Width (mm)	Length (mm)
3005 Aluminum plate sheet	O,H12,H14,H16 H18,H19,H22,H24 H26,H28,H32,H34 H36,H38	0.2-4.5	100-2600	500-16000

Final product:Cosmetic plate, copier drum, etc.

Performance advantage

- 1, 3005 aluminum plate sheet can adapt to the humid environment, with excellent corrosion resistance;
- 2, 3005 aluminum plate sheet has high strength, higher than the strength of 3003 aluminum plate 20%;
- 3, 3005 aluminum plate sheet has good deep drawing performance, formability, welding performance;
- 4, Haomei aluminum strict processing technology to make the product novel, durable, its tensile strength of up to 200N;
